

## **Lab 7 Enhancements**

### **Studying for Task 2**

1. Add an OLE object, Hyperlink and an Attachment to the Contractor table. Add a yes/no field to the Jobs table to show if it is new construction.
2. Create a form with all of the contractor's information and a sub-form that shows what jobs they are on.
3. Create a report that is grouped by contractor and shows all of the jobs they are on. Count all jobs for each contractor.
4. Create a query that shows all the jobs that are new construction.
5. Create a query that shows a count of how many contractors there are.
